

VITALI SHPAKOWSKI

Senior Full-Stack Engineer | Agentic AI Engineer

Minsk, Belarus, UTC+3 (Ready to relocate, remote)

v.shpakowski@gmail.com · Telegram · LinkedIn · GitHub · Portfolio

SUMMARY

Senior Full-Stack & Agentic AI Engineer with **14+ years** of experience architecting and building **high-load web, mobile, and backend systems** across FinTech, E-Commerce, and Enterprise AI. Deep hands-on expertise in **TypeScript, React, Next.js, Angular, Node.js, and NestJS**, combined with end-to-end **System Design** and **technical leadership**. Builds **Spec-Driven engineering workflows** powered by **AI Agentic Factories and LLMs** that enable lean teams to validate hypotheses faster and ship complex production systems without compromising architectural quality or code security. Creator of live production apps on the App Store and Google Play, including **Holdy** (Go to App), **Beerhandshake** (App Store · Google Play), and **Znichka** (App Store · Google Play).

CORE SKILLS

Agentic AI:	Harness Engineering (Skills, Rules, Hooks, MCP) · Context & Memory Engineering · Graph Engineering & Multi-Agent Orchestration · Spec-Driven Development · Claude Code · Cursor · Antigravity · Gemini CLI
Architecture:	System Design (Microservices, Micro-Frontends, BFF) · DDD · Clean & Hexagonal Architecture · Team Leadership · Event-Driven & CQRS · Monorepo · Feature-Sliced Design (FSD) · API Design & Contracts
Frontend:	TypeScript · React · Next.js (SSR/SSG) · Angular 18+ (Signals) · ECMAScript (ES6+) · RxJS · Zustand · React Query · NgRx · Module Federation · Tailwind CSS · SCSS/BEM · Web Vitals · Playwright · Vitest · Jest
Mobile:	Flutter · Dart · Riverpod · Local-First Architecture · Offline Sync (SQLite) · Telegram Mini Apps (TMA SDK) · App Store & Google Play Release
Backend:	Node.js · NestJS · PostgreSQL · Express.js · Prisma ORM · Redis · Supabase · Firebase · MongoDB · REST API · WebSockets · OAuth 2.0 / JWT / SSO · OpenSearch · Coveo AI
DevOps:	Docker · GitHub Actions · GCP · AWS · Jenkins · Oracle Cloud · Cloudflare · Nginx · Terraform · SonarQube

WORK EXPERIENCE

MCP COOP (Independent Product Studio & B2B Consulting) — Jan 2026 – Present

Co-Founder / Senior Full-Stack & Agentic AI Engineer

Co-founded an independent engineering studio with a small team, launching proprietary mobile/web products and delivering commercial B2B client projects across mobile apps, web services, Telegram Mini Apps, and bots.

- **Agentic AI:** Configured project-specific **AI Harness** setups (rules, skills, hooks, MCP) and subagent pipelines, transitioning the team to a **Spec-Driven workflow** from design to automated tests and review, speeding up feature delivery by **2–3x**.
- **Mobile Development:** Architected from scratch and launched **4 apps** on the **App Store and Google Play** following **SRP/SOLID** principles, featuring custom animations, offline mode with background sync, payment gateways, and in-app purchases.
- **Web Development:** Designed and engineered frontend and backend systems using **REST** and **real-time streaming**, integrating **LLM models** into business workflows, billing, and payment processing.
- **Authentication & Security:** Engineered unified auth systems powered by **Supabase** and **Firebase Auth** (**OAuth 2.0, SSO, JWT, RBAC**) with native Apple/Google Sign-In and seamless Telegram login.
- **Multi-Cloud CI/CD & Releases:** Automated build, multi-cloud deployment (**GCP, Oracle Cloud, Cloudflare**), and store publishing pipelines via **GitHub Actions, Codemagic, and Docker**.

Career Break / Sabbatical – Planned Sabbatical & Strategic Shift to AI — Jan 2025 – Dec 2025

Planned career break after 11 years in Enterprise; rebuilt engineering workflows and shifted technological focus toward software development with AI agents and LLMs.

EPAM Systems – Senior Software Engineer — Dec 2013 – Dec 2024

Minsk, Belarus (2013–2021) · Tbilisi, Georgia (2021–2024)

SAP Coveo AI Search Platform | Team Lead & Full-Stack Developer

- **BFF & Caching:** Designed a **NestJS BFF** middleware layer with **Redis** caching between the UI and external AI services to optimize query performance and reduce API latency.
- **Resilient AI Orchestration:** Engineered a backend feature-flag and custom fallback system for high-availability switching between **OpenSearch** and **Coveo AI**, and integrated GenAI responses into the search UI.
- **Leadership & Management:** Led a cross-functional team of 4 and performed over 50% of BA/PM duties, including stakeholder communication, backlog prioritization, and technical documentation.

US Bank Loyalty Program (MVP) | Full-Stack Developer (Key Developer)

- **Full-Stack Architecture:** Engineered an end-to-end banking loyalty MVP integrated via Open API, implementing **Next.js (SSR)** promotional pages, a client-side **React** admin dashboard, and a **PostgreSQL / Prisma ORM** data schema.
- **Security & Auth:** Developed a secure identity layer using **OAuth 2.0 (Google), OTP, and JWT** with granular role-based access control (RBAC).
- **CI/CD Automation:** Automated containerized build and deployment workflows via **Docker** and **GitHub Actions**.

Carrefour – E-Commerce Platform | Key Developer & Technical Coordinator

- **Product Impact:** Engineered high-conversion features for a **500K+ MAU** e-commerce platform, including multi-step product filtering and an optimized checkout flow.
- **DevOps & Quality:** Built a CI/CD pipeline with integrated static analysis (**Jenkins, SonarQube**) and build-time quality gates.
- **Stakeholder & Team Coordination:** Coordinated a sub-team of 2 developers in Agile/Scrum and acted as the technical bridge between business analysts and engineering for backlog grooming.

Refinitiv – Financial Trading Platform | Key Developer

- **Real-Time Web Architecture:** Owned the release of two **Angular** trading applications (including migrating a monolithic C# desktop client) across a sub-team of 3 engineers, handling high-frequency **WebSocket** data streams.
- **API Transformation:** Engineered a custom **Express.js** transformation layer bridging legacy **SOAP** services with a modern **REST API**.
- **Frontend Optimization:** Reduced initial load time by **60% (from 5s to 2s)** via lazy loading and code splitting while maintaining **80%+** test coverage.

MoneySuperMarket – Financial Services Aggregator | Key Developer & Supervisor

- **Micro-Frontend Architecture:** Engineered the core platform (**10M+ users/mo**), orchestrated the migration from AngularJS to **Angular**, and designed a micro-frontend integration into **Adobe CQ5 (AEM)** that reduced deployment time by **40%**.
- **Performance & UI Library:** Optimized initial load time by **42% (from 6.5s to 3.8s)** and built a library of **50+ reusable BEM components** with strict code review standards, decreasing production bugs by **60%**.
- **Team Supervision:** Supervised a UI sub-team of 4, organizing technical refinement and sprint planning with a consistent **95%** sprint completion rate.

Startup Labs – Middle Frontend Developer — Apr 2013 – Dec 2013

Built mobile-first websites for consumer lending services, designing a system of reusable SASS/BEM style mixins and interactive loan application forms with client-side validation.

Axamit Versa – Junior Frontend Developer — Apr 2012 – Mar 2013

Built responsive web interfaces for commercial projects on Adobe AEM (CQ5), extracting common interactive elements into a unified reusable UI library.

PRODUCTION PROJECTS

HOLDY (Go to App) – Mobile service for turning promo codes, QR codes, and tickets into interactive digital gifts with themed postcards, scheduled delivery, and Apple/Google Wallet integration.

BEERHANDSHAKE (App Store · Google Play) – Social mobile app for sports predictions and friendly wagers featuring private rooms, live match tracking, and an automated Splitwise-style debt balancing engine.

ZNICHKA: PUZZLE GAME (App Store · Google Play) – Logic puzzle game combining falling-block and number-merging mechanics where connecting identical numbers triggers chain reactions and cascading board clears.

EDUCATION

Systems Engineer – Belarusian State University of Informatics and Radioelectronics (BSUIR) · Minsk, Belarus — 2006 – 2011
